Superior	Luminous	Memory, Imagination, and Willpower
	Reflecting	Perception, both internal and external
Inferior	Chemical	Metabolism, biochemical processes
	Ether of Life	Sexual Reproduction

SUPERIOR ETHERS

I learned to liberate the two superior ethers in order to travel with them far away from the physical body during the Second Initiation of the Fire.

Unquestionably, clairvoyant and clairaudient perceptions are extraordinarily intensified when one absorbs the two superior ethers in one's astral body.

IMAGINATION

The Gnostic who wants to reach Imaginative Knowledge must learn to concentrate and know how to meditate. The Gnostic must provoke drowsiness during the practice of meditation.

Meditation must be correct. The mind must be exact. Logical thought and exact concept are needed for the purpose of developing the internal senses absolutely perfectly.

INSPIRATION

When the Gnostic reaches Imaginative Knowledge he sees the symbols but he does not understand them. He comprehends that all of nature and the ego are a living scripture that he does not know. The Gnostic then needs to elevate himself towards the Inspired Knowledge, in order to interpret the sacred symbols of great nature and the abstract language of the ego.

INTUITION

If the Gnostic practices with tenacity and supreme patience, then his own internal God will teach him and instruct him in the Great Work. Thus, he will study at the feet of the Master. He will elevate himself to Intuitive Knowledge.
