

The Chakras

The Universal Fire

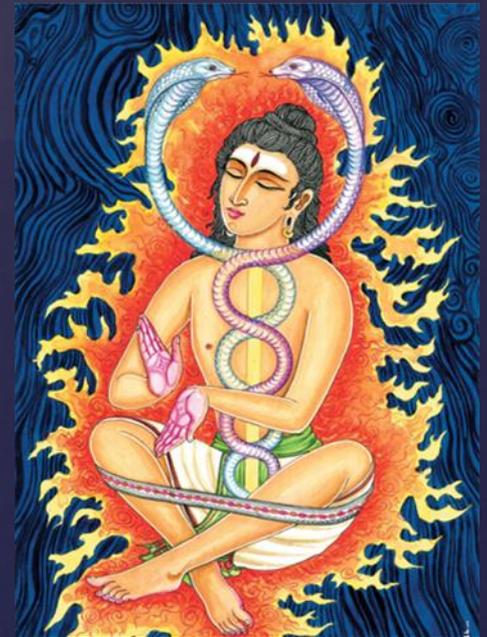

Oh Devi-Kundalini! You are the fire of the seven Laya centers of the universe.

The seven Laya centers of the universe are the seven degrees of power of the fire.

Seven churches exist in the Chaos where the seven planetary Logoi officiate.

These seven churches also exist within the spinal medulla of the human being.

Prana

“Prana is the Great Breath. It is the Cosmic Christ. Prana is the life that palpitates within every atom, as it palpitates in every sun. Fire burns because of Prana. Water flows because of Prana. Wind blows because of Prana. The sun exists because of Prana; the life we have is Prana. Nothing can exist in the Universe without Prana.”

The Yellow Book

Modifications of Prana

Prana is the Vital Christ or Great Breath. That Vital Christ is modified into Akasha, within which the Son, the First Begotten, the Purusha [*Innermost*] of every human being, is hidden.

Akasha is modified into Ether, and the Ether is transformed into Tattvas. The Tattvas are the origin of fire, air, water, and earth.

Therefore, everything that exists, everything that has been, and everything that shall be comes from the Great Breath, the Cosmic Christ, the Army of the Voice, whose supreme commander is Jesus Christ.

Tattvas and Hormones

Our Ethereal Body is formed by the tattvas. The tattvas and the chakras are intimately related. The tattvas enter the chakras and then pass into the interior of the glands of internal secretion. When the tattvas are inside these minute endocrine laboratories (the glands), they intensify the glands' work by transforming themselves into hormones. Thus, the tattvas enter the organism but do not leave it.

The tattvas also transform themselves into genes and chromosomes that later on transform themselves into spermatozoids.

Everything comes from ether. Everything returns into ether.

Fundamental Notions of Endocrinology and Criminology

Chemical Messengers

Hormone: chemical messenger released into the blood stream and reaches its target seconds or minutes later.

Neurotransmitter: chemical messenger released between neurons (cells), particularly in the brain.

Some endogenous chemicals, such as dopamine and adrenaline (epinephrine) are both hormones and neurotransmitters, depending upon where it is being used in the body.

It is the three dimensional geometric shape of the molecule which gives the messenger its properties.

In Greek we could say χημεία ἄγγελος or “chemical angel.”

Astral Chakras

The chakras in common and ordinary people are only the senses of their animal-soul. Their chakras are intimately related with the psychic-biological functions of their human organism. The Tattvas enter through the chakras and then into our endocrine glands; the endocrine glands then transform the Tattvas into hormones.

So, the Astral chakras are the gates of entry for the Tattvas.

The Seven Words

Chakras and Churches

...when the Astral body is Christified by means of the third degree of the power of fire, then the seven chakras are transformed into the seven churches to which the Book of Revelation (Apocalypse) refers. We stated in our book entitled *The Revolution of Beelzebub* that the seven churches are found located within the Soul-Spirit or Body of the Consciousness, this is how it is; nevertheless, when the third degree of the power of fire opens the Astral chakras, these are then transformed into the very seven churches. Without the third degree of the power of the fire, the chakras are just senses of the animal soul [nephesh]. Therefore, whosoever is only concerned with the development of the chakras, without working for their Christification, transforms themselves into black magicians.

Transmutation

“The pure Akasha that circulates within the Brahmanic cord passes through this magnetic field by the root of the nose.

The three breaths of pure Akasha descend through the Brahmanic cord in order to be combined with the seminal atoms that ascend when the sexual impulse is refrained.”

Christs Will

The Kundalini is Akashic

The Akash is the vehicle of sound. The Kundalini is Akashic. Therefore, one cannot incarnate the Word without the Akash, since the Akash is the vehicle of sound.

This is why we need to raise the Akashic serpent in order to incarnate the Word, Christ.

The Kundalini (Akashic fire) becomes creative with the Word, because the Kundalini is the vehicle of the creative Word.
